No Person shall, within any of the Zones defined in the By-law and delineated on the Zoning Maps hereto appended, erect or Use any Building or Structure, or Use any land in whole or part except in such manner and for such purposes as are set forth in this By-law.

4.5 INCORPORATION OF ZONING MAP

The location and boundaries of the Zones established by this By-law are shown on the Zoning Maps hereto appended as Schedules A, and Parts 1 and 2 to Schedule A which are hereby incorporated in and declared to form part of this By-law.

4.6 INTERPRETATION OF ZONING MAP

Where uncertainty exists with respect to the boundaries of the various Zones as shown on the Zoning Maps, the following provisions shall apply:

a) Street, Lane, Right-Of-Way, or Watercourse

Unless otherwise shown, a Street, Lane, railway Right-Of-Way, electrical transmission line Right-Of-Way, creek or watercourse shall be included within the Zone of the adjoining property on either side thereof and where such Street, Lane, Right-Of-Way, creek or water course serves as a boundary between two or more different Zones, the centre line of such Street, Lane, Right-Of-Way, creek or watercourse extending in the general direction of the long dimension thereof, shall be deemed to be the boundary between Zones.

b) Lot Lines

Where any Zone boundary is not shown to be a Street, Lane, Right-Of-Way, creek or watercourse, and where the boundary approximately follows lot lines, such lot lines shall be deemed to be the Zone boundary.

c) Closed Street, Lane or Right-Of-Way

In the event a Street, Lane or Right-Of-Way and the limits of any portion thereof is closed, the property formerly within such Street, Lane or Right-Of-Way shall be included within the Zone adjoining the property, and where such Street, Lane, or Right-Of-Way was a Zone boundary, the new Zone boundary shall be the former centre line of the closed Street, Lane or Right-Of-Way.

Certain lands within the Municipality are subject to Fill, Construction and Alteration Regulations pursuant to the Conservation Authorities Act, R.S.O. 1990, Chap. C.27, as amended. The limits of these Conservation Authority Regulated areas are shown for informational purposes on the Schedules to this By-law. Where any Zone boundary is shown as following the limits of a Conservation Authority Regulated area, the Zone boundary shall be deemed to correspond with the limits of such Regulated area. In the event that an application is made to,

and approved by, the Conservation Authority for a permit pursuant to the Fill, Construction and Alteration Regulations, the lands for which such permit is issued shall be deemed to be included within the same Zone as the adjoining non-Regulated lands.

e) Scale From Zoning Map

Where any Zone boundary is left uncertain after application of the provisions of **Section 4.6**, subsections a), b) c) and d), of this By-law, then the boundary shall be determined by scale from the zoning maps to the centre of the Zone boundary line. Notwithstanding this, where any zone boundaries remain uncertain, the author of such mapping information constituting the By-law schedules shall have the ultimate authority to determine boundaries.

TABLE 5: Permanent Manure or Material Storage Types

Solid Manure: 18% dry matter, or more

Liquid Manure: Less than 18% dry matter

Digestate: Less than 18% dry matter

Storage Odour Potential	Solid or Liquid System	Inside or Outside Livestock Facility	Number referred to in Table 6	Description of permanent manure storages being sited by MDS II, or encroached upon through MDS I application
Very Low	Solid	Inside	V1	Solid, inside, bedded pack (manure accumulates under livestock over time)
		Outside	V2	Solid, outside, covered (cover keeps off precipitation to prevent runoff)
			V3	Solid, outside, no cover, greater than or equal 30% dry matter (manure is dry enough that a flowpath option can be used for runoff control (Nutrient Management Act, 2002)
			V4	Solid, outside, no cover, 18% to less than 30% dry matter, with covered liquid runoff storage (manure not dry enough to soak up precipitation, so a liquid runoff storage needed but it has a permanent, tight cover)
	Liquid	Inside	V5	Liquid, inside, underneath slatted floor (manure is stored under the animals in the barn)
		Outside	V6	Liquid, outside, with a permanent, tight fitting cover (negative pressure tarp, concrete lid, inflatable dome, etc.)
			V7	Liquid, (digestate), outside, no cover (all manure has been treated through anaerobic digestion, or a similar process that reduces odours)
Low	Solid	Outside	L1	Solid, outside, no cover, 18% to less than 30% dry matter, with uncovered liquid runoff storage (manure not dry enough to soak up precipitation, so a liquid low runoff storage needed, but it is uncovered, producing more odour than in V4 above)
	Liquid	Outside	L2	Liquid, outside, with a permanent floating cover (tarps, foam panels, etc.)
Medium	Liquid	Outside	M1	Liquid, outside, no cover, straight-walled storage (usually circular or rectangular, concrete or steel storages)
			M2	Liquid, outside, roof, but with open sides (roof keeps off precipitation, but the open sides allow wind to travel over the manure and carry odours)
High	Liquid	Outside	H1	Liquid, outside, no cover, sloped-sided storage (earthen manure storages, but not earthen runoff storages associated with a solid manure storage which are L 1 above)
